

Written by Hiroshi Koyama (National Institute for Basic Biology, Japan)

This folder contains files related to run ImageJ macros in Koyama et al. (An ImageJ-based tool for three-dimensional registration between different types of microscopic images).

1. “Macros” folder

Three macros are included.

2. “Protocol.pdf”

The protocol for the three macros is provided.

3. “sample files” folder

Images and input files used in Koyama et al. are provided. Output files of the macros are also provided. In each sub-folders (step1...step3...) in this folder, users can run the macros.
